**ORDER APPOINTING TECHNICAL ADVISOR**

The Court finds that the technology in the above-captioned case is exceptionally complex and warrants the appointment of a technical advisor. This case involves U.S. Pat. No. 7,554,126 which is titled “Semiconductor light-emitting element, manufacturing method and mounting method of the same and light-emitting device” and relates to semiconductor device and fabrication technology. The patent is classified in the fields of Active Solid-State Devices (e.g., Transistors, Solid-State Diodes), Incoherent Light Emitter Structure (257/79) and Semiconductor Device Manufacturing: Process, Making Device or Circuit Emissive of Nonelectrical Signal (438/22). The specification discusses an LED chip which has a structure in which an n-type semiconductor layer and a p-type semiconductor layer are successively formed on the lower face of an element substrate, with the p-type semiconductor layer being formed on an area except for an area for an n-electrode. ’126 Patent at Abstract. Full appreciation of the parties’ upcoming arguments requires a detailed understanding of electrical engineering and semiconductor fabrication.<sup>1</sup>
